DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

The overall combination of structure of a document imaging background member as recited in claim 1 including particularly a substrate having a dark color and wherein at least of portion of a surface of the substrate is coated with a fluorescent coating which permits the dark color of the substrate to appear when the fluorescent coating is not exposed to a light source, and the fluorescent coating fluoresces or emits light in response to exposure to the light source so as to appear white, is not taught nor suggested by the prior art of record. Independent claims 10 and 21 directed to an imaging device that contains a substrate having the same structural limitations as discussed above are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
